MORE THAN 20 YEARS OF EXPERIENCE

ENDORISING OUR UPWARD PROGRESSION

From our beginning in 1993, Grupo Cosoltrans has stood out from our competitors with a corporate philosophy that encompasses an innovative and entrepreneurial spirit, which is focused on offering the best diversified portfolio of services to our clients.

We have positioned ourselves as a solid benchmark in the logistics, storage and distribution sectors. We are also leaders with specific transport dedicated to public works and arid and environmental waste sectors.

Over the years, we have continued to evolve and expand our capital with significant investments, therefore, both the internal and external support of our group reflect the passion by which the project grows day by day with a global vision and a focus on excellence.

Likewise, throughout our journey we have felt the support and trust of a team of highly trained professionals who work to consolidate a more sustainable project. This success has been achieved thanks to the displaying of the values infused by our associations, through actively looking at social, economic and environmental improvement.

As a leading group in the sector, our objective is to continue growing with our future projects, for example, the integrated transportation centre of the southeast project. This will create new warehouses, parking lots for heavy goods vehicles and laundry. This project will also produce a warehouse, refrigeration chambers and a fuel service station.

At Grupo Cosoltrans, we are constantly committed to maximum development as a platform to conquer new horizons.

LOGÍSTICA DE FRÍO

VACCUUM COOLING SYSTEM

Vacuum cooling or vacuum coolers is the most efficient industrial refrigeration system. It is a technological solution originally developed for the ultra-fast cooling of perishable crops in remote locations.

Vacuum precooling is based on the application of vacuum to the product while cooling. Thus, we manage to evaporate the water from the product, therefore lowering its temperature. In operating cycles of 25 minutes, 2 to 3 endings are achieved.

Due to its characteristics, the highest efficiency is reached in crop variants with a large surface area such as leafy vegetables; Iceberg Lettuce, Romaine, Batavia, Trocadero, Chicory, Endive, Spinach etc. It is also used for products with different characteristics such as Strawberries, Mushrooms, Peanut Butter, Sweetcorn or even grass.

Due to need, this system has been extended over the whole for the preservation of fresh-cut products and among minimally processed products.

It is specifically designed to start the cold cycle. Its capacity varies from 1 to 24 pallets or from 7 to 95 m³ of chamber. Our trailer coolers are mobile versions of our standard refrigerators, with up to four pallets per charge. In addition, we have customized solutions thanks to our modular design.

With a generator on trailer, these solutions are completely autonomous and with hybrid mobility, a semi-mobile solution can be provided. We offer affordable flexibility at the lowest total cost.

We have a modern fleet of more than 120 refrigerated trailer trucks, to guarantee maximum traceability and respect for the cold chain in all our processes.

We have extensive facilities equipped with all the technical and logistical resources necessary to guarantee a comprehensive service.

All our vehicles have a built-in GPS system that allows us to geolocate the cargo at any time.

In addition, all refrigerators have thermographs.

Superior quality of service:

- We have state-of-the-art equipment, several of them bitemperature.
- Full or fractional truck service.
- Control of goods in real time with GPS technology.
- Customer service in several languages.
- Possibility of 2 drivers.

THE MOST PROFITABLE GROUPS

Do you need to transport small or medium volume loads frequently?

Do you need to distribute products throughout the EU at the lowest cost with all the guarantees?

Do you need to schedule regular shipments?

We have the solution

- Groupage method. Large volume of shipments and wide network of agents
- Departures from Almeria, Alicante, Murcia and Valencia
- Destination France, Germany, Netherlands and Belgium

Full and split loads throughout Europe

- National and European destinations
- We adapt our services to each client
- Option to import or export from and to any country in Europe, with maximum fluidity, regularity, flexibility and security.

Cosoltrans

TRANSPORTE INTERMODAL

With our intermodal transport service we achieve a fast and efficient management in the transfer of goods by plane, boat and train.

We are able to build a chain of transport services through different combined means.

INTERNATIONAL MARITIME TRANSPORT

Containers to and from any point in the world both in full container and groupage.

Specialists in the import of perishable product from South America, multi-product import from the far east and export and import of raw materials.

Comprehensive door-to-door service for both import and export, as well as dry storage and perishable products.

Cosoltrans
LOGÍSTICA Y DISTRIBUCIÓN

DISTRIBUTION

- Logistics, transport and distribution by road of all types of merchandise (frozen, refrigerated and dry).
- More than 100 vehicles of different weights and dimensions as well as vans equipped with a lifting platform, double deck and multi-temperature.
- Integrated GPS system and temperature control.
- C• Specialized drivers and support staff.

STORAGE

- Facilities for unloading and storage of dry products in all our warehouses.
- Refrigerating chambers in the area of Alicante and Murcia for refrigerated products.
- Possibility of carrying out the subsequent distribution of the merchandise with rigid trucks and trailers.

DENSITY AND INDUSTRIAL TRANSPORTATION

More than 50 trailer trucks adapted to meet specific requirements

Density and industrial transport such as pipes, prefabricated, structures and any other material that requires low sides and/or open bodies.

We can get generic and special permits for those goods that exceed standard weight and dimensions. In addition, we export to France, Belgium and the Netherlands with first category permits.

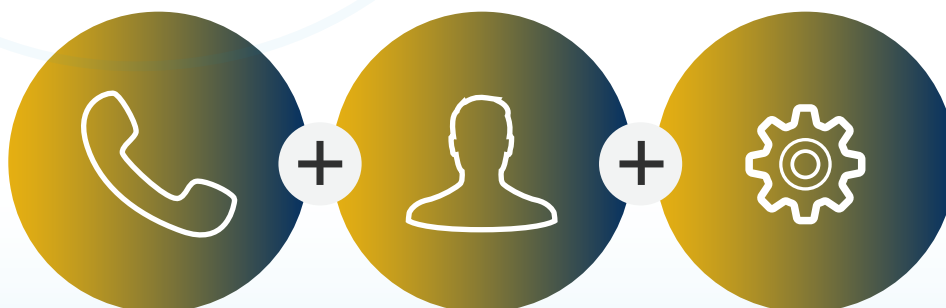

PALLETIZED TRANSPORT AND ORNAMENTAL PLANTS. More than 55 trailer trucks with tarpaulins, tautliner and semi-tautliner.

National and international transport of all types of bulk and bagged merchandise.

Specialized in the transport of ornamental plants in bulk or carts.

SABEMOS
LO QUE TE
IMPORTA,
POR ESO LO
ASEGURAMOS

Telephone sales:

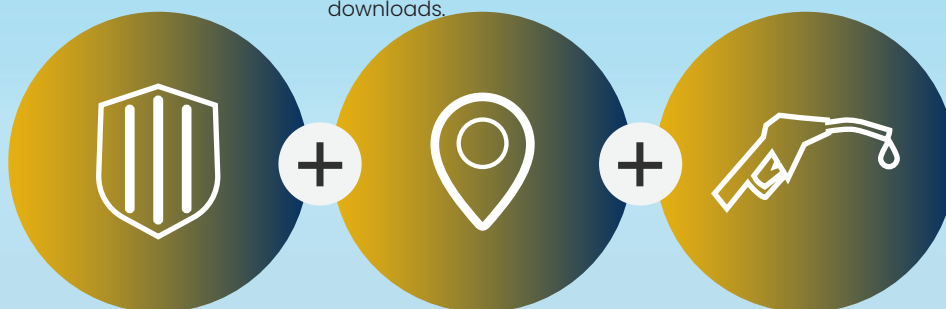

Specialized in services for the transport sector.
Contracts and terminals at an unbeatable price.
We study your call traffic and consumption to offer you the best option.

Tax and accounting advice:

All types of documentation related to transportation. Tax and accounting services.
Tax and accounting services.
Vehicle transfer.
Renewal of authorizations and request for special permits. Digital tachograph downloads.

Maintenance:

Mechanical workshop and washing.
Own workshops in our facilities and credit in different workshops.
Advance system of funds for the payment of fines or any other needs.
Truck washing facilities.

Sale and management of insurance:

We work with the best insurance companies. High number of policies that provide us with very competitive prices.
We compare with the main companies.
Custom Advisors.

Electronic toll:

Easy, fast and safe.
Drive without problems on all national and European highways.
GPS systems for strict control of the fleet, both vehicles belonging to the company and those of collaborators.

Fuel sales:

Quality at the best price.
First-class diesel and Adblue pumps at highly adjusted prices.
National agreements and cards for international destinations.

Our main objective is to become the leading reference in the Levante area as a company specialized in large earthworks, as well as to expand our capacity in the general construction of civil engineering.

Responsibility

We ensure transparency in our internal and external procedures. We get the full satisfaction of our clients in all projects. We also have a social responsibility and respect for the environment.

Projects

We have excelled in the development of infrastructure projects such as highways, roads, industrial states, urban centres, housing estates, treatment plants, dams and other works. We always reach the highest quality required.

Resources

We are one of the companies in the Levant area with the greatest material means for the execution of earthworks, since we have a large fleet of machinery and civil engineering vehicles in our possession.

Investment and development

We seek the most efficient and environmentally friendly technological means. We make significant annual investments in environmentally friendly machinery and trucks.

TRANSPORT OF CIVIL ENGINEERING:
SPECIALIZED IN AGGREGATES,
AGGLOMERATES, GRAVEL AND
MUCH MORE.

Cosoltrans
ÁRIDOS Y RESIDUOS

ENVIRONMENTAL TRANSPORT: :100% COMMITED TO OUR ENVIRONMENT

We have movable flatbeds and high-capacity containers prepared for the land transport of waste and dangerous and non-dangerous goods, complying with the European agreement for the international transport of dangerous goods by road (ADR) and with the ISO 14001 standard.

Due to the adherence of these rules which are common to countries within the European Union and due to the qualification of our staff, we are able to offer transport services for goods that require special treatment without causing environmental damage.

We have consolidated a recognized track record in the transport sector in the service of civil engineering, thanks to our marked focus on offering the highest guarantees at all times.

To offer this service, we have a modern and large fleet of trucks and special vehicles equipped to transport aggregates, agglomerates and gravel, as well as any type of construction material, to and from the point that our clients need.
